§ 70.8 [Amended]

10. In § 70.8, paragraph (b) is revised to read as follows:

§ 70.8 Information collection requirements: OMB approval.

(b) The approved information collection requirements contained in this part appear in §§ 70.19, 70.20a, 70.20b, 70.21, 70.22, 70.24, 70.32, 70.33, 70.34, 70.36, 70.39, 70.50, 70.51, 70.52, 70.53, 70.57, 70.58, 70.59, and 70.60.

11. A new § 70.50 under "Special Nuclear Material Control, Records, Reports and Inspections" is added to read as follows:

§ 70.50 Notification requirements.

(a) *Immediate notification.* Each licensee shall notify the NRC as soon as

possible but not later than 4 hours after the discovery of any event involving licensed material that prevents or threatens to prevent immediate protective actions necessary to maintain and verify control of licensed material (includes fires, explosions, toxic gas releases, etc.).

(b) *Twenty-four hour notification.* Each licensee shall notify the NRC within 24 hours after the discovery of any of the following events involving licensed material:

(1) Any contamination event that restricts access to the contaminated area by workers or the public for more than 24 hours.

(2) Any event in which equipment necessary to prevent uncontrolled releases of radioactive material, or to prevent exposure to radiation, or to mitigate the consequences of an accident is disabled or fails to function as designed when it is needed. Notification is not required when an individual component is disabled or fails to function if redundant equipment is operable and available to automatically perform the required function.

(3) Any event that requires medical treatment of a radioactively contaminated individual at a medical facility. Notification is not required if first aid at a licensee-maintained medical facility for a superficial injury is the only treatment rendered.

(4) Any fire or explosion damaging any licensed material or any device, container, or equipment containing licensed material.

(c) *Preparation and submission of reports.* Reports filed with the NRC pursuant to this section must have the names of persons who have received exposure to radiation stated in a separate part of the report. Reports made by licensees in response to the requirements of this section must be made as follows:

(1) Licensees shall make reports required by paragraphs (a) and (b) of this section by telephone to the NRC Operations Center.¹ To the extent that the information is available at the time of notification, the information provided in these reports must include:

- (i) The caller's name and call back telephone number;
- (ii) A description of the event, including date and time;
- (iii) The exact location of the event;
- (iv) The isotopes, quantities, and chemical and physical form of the licensed material involved; and
- (v) Any personnel radiation exposure data available.

(2) Written report. Each licensee who makes a report required by paragraph (a) or (b) of this section shall prepare a written followup report within 30 days of the initial report. These written reports must be sent to the U.S. Nuclear Regulatory Commission, Document Control Desk, Washington, DC 20555, with a copy to the appropriate NRC regional office, listed in appendix D of 10 CFR part 20. The reports must include the following—

(i) A description of the event, including the probable cause and the manufacturer and model number (if applicable) of any equipment that failed or malfunctioned;

(ii) The exact location of the event;

(iii) The isotopes, quantities and chemical and physical form of the licensed material involved;

(iv) Date and time of the event;

(v) Corrective actions taken or planned and the results of any evaluations or assessments; and

(vi) The extent of exposure of individuals to radiation or to radioactive materials.

(3) The provisions of § 70.50 do not apply to licensees subject to the notification requirements in § 50.72 of this chapter. They do apply to research and test reactors possessing material licensed under part 70.
