Mr. Robert A. Clark, Chief
Operating Reactors Branch #3
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: NUREG-0737 II.B.3
Post Accident Sampling System

Dear Mr. Clark:

With respect to your letter dated July 9, 1982, requesting a schedule for responding to the eleven (11) criteria of NUREG-0737, II.B.3, Post Accident Sampling System, we have made numerous submittals to the NRC addressing item II.B.3. In your letter of March 24, 1982, the only item remaining open under II.B.3 is ORNL's investigation of source terms.

In view of the many different areas of correspondence, and the additional confusion introduced by referencing such correspondence, we feel that it would be appropriate for us to reassemble and re-evaluate our responses and present them in a stand-alone response document. We, therefore, will provide said response within 60 days of the date of this letter. We would hope, however, that we are not going to be in a situation of re-reviewing all of the NUREG 0737 items in the future.

Very truly yours,

Don W. Warembourg
