Attn: S. Stoffel

Dear Mr. Sparks:

The Maine Bureau of Civil Emergency Preparedness (MECEP) is most desirous of correcting/eliminating all discrepancies associated with the State of Maine radiological Incident Plan, in an expeditious manner.

Presently, we have a listing of discrepancies developed as a result of the Regional Assistance Committee (RAC) and the first Maine Yankee exercise, which was conducted on Saturday, 26 September 1981. In our opinion, many of the "discrepancies" noted were listed as a result of incorrect conclusions drawn by observers and/or an incomplete understanding of existing systems or procedures.

Accordingly, we have scheduled a review of these discrepancies on Wednesday, 18 August 1982 in this office, commencing at 9 a.m. It is requested that Ms. Sharon Stoffel and Mr. Brian Grimes attend this meeting which could result in the resolution of numerous deficiencies which we do not think are applicable within our State "Plan" and/or at the county and local level. It is further requested that Federal Emergency Management Agency, Region One request the assistance of Mr. Brian Grimes or other Nuclear Regulatory Commission representative at this forthcoming meeting.

If additional data is required, please contact Robert Caspole, tel. 207/622-6201 at your earliest convenience.

Sincerely,

*Richard D. Dutilleul*
