

NOV 08 1990

Terre Haute Regional Hospital  
ATTN: David Loving, Assistant  
Administrator  
601 Hospital Lane  
Terre Haute, IN 47802

License No. 13-09649-01  
Docket No. 030-00203

Gentlemen:

This refers to the routine safety inspection conducted by James Mullauer, M.H.S. of this office on October 11, 1990 of activities authorized by License No. 13-09649-01 and to the discussion of our findings with you and members of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

In addition to the above areas, the inspector examined actions taken regarding an apparent violation found during our August 2, 1989 inspection. We have no further questions regarding this matter.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

William H. Schultz, Chief  
Nuclear Material Safety  
Section 1
