License No. SNM-1456
Docket No. 030-02043; 030-00274
Docket No. 070-01507

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. S. J. Mulay, M. F. Kurth and myself on October 16-17, 1990 of activities authorized by NRC Byproduct Material License No. 21-04109-16 and 21-04109-08 and Special Nuclear Material License No. SNM-1456 and to the discussion of our findings with you and other staff members at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspectors examined actions described in your letter dated October 12, 1988, regarding violations found during our August 17-18, 1988 inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities under License No. 21-04109-08 and No. 21-04109-16 appeared to be in violation of NRC requirements, as specified in the enclosed Notice and a written response is required. No violations were identified for License No. SNM-1456.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
