

NOV 9 1990

License No. 40-18451-01
Docket No. 30-15111/90-01

City of Yankton
Engineering Department
City Hall
ATTN: Eugene G. Hoag
Director of Public Works
5th and Walnut Street
Yankton, South Dakota 57078

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Ms. L. L. Kasner of this office on October 25, 1990, of the activities authorized by NRC Byproduct Material License No. 40-18451-01, and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, and observations by the inspector.

The inspector also reviewed the actions you had taken with respect to two violations observed during our previous inspection conducted on January 21, 1987. She verified that corrective actions had been implemented for each of the violations and that these measures had been sufficient to prevent recurrence of the violations during this inspection period.

Please note that no violations were observed during this inspection and no response to this letter is required.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By:

A. B. BEACH
