Mr. David L. Meyer
Chief, Regulatory Publications Branch
Div. of Freedom of Information and Publications Serv.
Office of Administration
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Meyer:

With reference to the published document entitled "public disclosure of selected general licensee information" dated 10th, October 1990.

As outlined in the document I hereby raise an objection to the NRC releasing the names and addresses of general licensees identified in the quarterly reports of transfer.

SRB Technologies is a manufacturer of a number of generally licensed products including self powered exit signs. By releasing the names and addresses of general licensees, this gives immediate access to my customer base by my competitors.

It costs my company thousands of dollars each year in marketing our products to obtain these valued customers, and I strongly object to the possibility of my competitors obtaining this information from the NRC at minimum cost.

Truly yours,

Brian Pullen
President
