Reportable Occurrence 82-21/01T-0

Subject: CEA Drop Transient Reanalysis

Dear Sir:

In Reference (b), we reported interim measures taken to incorporate consideration of xenon burnout effects on the CEA drop transient response at Maine Yankee.

1. This transient will be reanalyzed to explicitly account for these effects and the results will be submitted along with the cycle 7 reload analysis.

We trust this information is satisfactory. Should you have any questions, please do not hesitate to contact us.

Sincerely,

MAINE YANKEE ATOMIC POWER COMPANY
