

UNITED STATES NUCLEAR REGULATORY COMMISSION
DOCKET NOS. 50-313 AND 50-368
ARKANSAS POWER AND LIGHT COMPANY
NOTICE OF ISSUANCE OF AMENDMENTS TO FACILITY
OPERATING LICENSES

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 66 and 34 to Facility Operating License Nos. DPR-51 and NPF-6, issued to Arkansas Power and Light Company (the licensee), which revised the Technical Specifications for operation of Arkansas Nuclear One, Unit Nos. 1 and 2, respectively, (the facilities) located in Pope County, Arkansas. The amendments are effective as of the date of issuance.

The amendments revise the ANO-1&2 Environmental Technical Specifications relating to the reporting of radiological gaseous effluents and delete certain nonradiological water quality surveillance requirements of ANO-2 ETS Section 3.2.2.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments pertaining to the reporting requirements for both ANO-1&2 will not result in any significant environmental impact and that pursuant to 10 CFR/§51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

With regard to the deletion of certain nonradiological water quality surveillance requirements of the ANO-2 TS, the Commission has determined that the issuance of the ANO-2 amendment is a ministerial action required as a matter of law and therefore no environmental impact statement or negative declaration and environmental impact appraisal need be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendments dated December 1, 1981, (2) Amendment No. 66 to License No. DPR-51 and Amendment No. 34 to License No. NPF-6, and (3) the Commission's letter dated July 29, 1982 . All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D. C. and at the Arkansas Tech University, Russellville, Arkansas. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 29th day of July, 1982.

FOR THE NUCLEAR REGULATORY COMMISSION

Sydney Miner, Acting Chief
Operating Reactors Branch #4
Division of Licensing
