

License No. 35-23193-01  
Docket No. 030-28835/90-03

NOV 20 1990

Edwards Pipeline Testing, Inc.  
ATTN: Don E. Edwards  
1205 South Gillette Avenue  
Tulsa, Oklahoma 74104

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Mr. R. Brown of this office on October 23, 1990, of the activities authorized by NRC Byproduct Material License No. 35-23193-01, and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection. The enclosed NRC Inspection Report 030-28835/90-03 documents this inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

This inspection was conducted aboard McDermott Lay Barge 29 operating in the Gulf of Mexico. Although gamma radiography was not being performed during the inspection, the inspector did review other aspects of your licensed program and noted that your radiography crew appeared knowledgeable about NRC requirements. All required equipment, instrumentation, and records were observed to be available for use.

No violations or deviations were identified.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,

/S/

A. Bill Beach, Director  
Division of Radiation Safety  
and Safeguards
