

Rec'd CRBRPO
7/2/82

Dear Nunzio PALLADINO, chairman of NRC

Please consider the "waste disposal" problem and Major changes in design of CLINCH RIVER Breeder Reactor in its upcoming licensing proceedings. Do NOT License ANY New Nuclear Power plants. especially the CLINCH RIVER Breeder Reactor.

- 1 You should issue a draft supplement to the FINAL ENVIRONMENTAL Impact Statement for the CRBR and circulate it to me for comments. Although this would hardly be necessary if you took the only the path of people and the earth before one of profit. There is no place for nuclear waste or bombs in contemporary society.

P.S. Why don't you see if you can license nuclear weapons too. If do you could ban the use of further production & cause disarmament on the grounds that they aren't safe.
