Washakie Memorial Hospital  
ATTN: Mr. John E. Frautschi  
Administrator  
15th Street  
Worland, WY 82401

Gentlemen:

This refers to the routine safety inspection conducted by Mr. R. Wise of this office on June 25, 1982, of the activities authorized by the NRC Byproduct Material License 49-17061-01 and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations, and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

No violations of NRC requirements were found during this inspection.

Mr. Wise also reviewed the action you had taken with respect to two violations observed during our previous inspection, which was conducted May 17, 1978. He verified that the corrective action with respect to these items was implemented as stated in your replies of June 8, 1978, and June 30, 1978, to our letters dated June 2, 1978, and June 19, 1978.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,

Glen D. Brown, Chief  
Technical Program Branch
