

ENCLOSURE 1

NOTICE OF VIOLATION

Tennessee Valley Authority
Sequoyah

Docket Nos. 50-327, 50-328
License Nos. DPR-77, DPR-79

During the Nuclear Regulatory Commission (NRC) inspection conducted October 6, 1990, through November 5, 1990, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1990), the violations are listed below:

Technical Specification 6.8.1 requires that written procedures shall be established, implemented and maintained covering Fire Protection Program implementation.

Physical Security Instruction 13, revision 55, Fire, attachments E and H, detail the controls imposed on transient fire loads in safety-related areas. The procedure requires, in part, that equipment shipped in untreated combustible containers may be unpacked in safety-related areas only if the containers are immediately removed following unpacking. In addition, the containers shall not be left unattended for any period of time before, during, or after the unpacking process.

Contrary to the above, for the period of October 1 through October 11, 1990, a large amount of non fire rated wood was left unattended in the auxiliary building on elevation 669.

This is a Severity Level IV violation (Supplement I)

Pursuant to the provisions of 10 CFR 2.201, Tennessee Valley Authority is hereby required to submit a written statement or explanation to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector, Sequoyah, within 30 days of the date of the letter transmitting this Notice. This reply should be clearly marked as a "Reply to a notice of Violation" and should include [for each violation]: (1) admission or denial of the violation, (2) the reason for the violation if admitted, (3) the corrective steps which have been taken and the results achieved, (4) the corrective steps which will be taken to avoid further violations, and (5) the date when full compliance will be achieved. Where good cause is shown,

consideration will be given to extending the response time. If an adequate reply is not received within the time specified in this Notice, an order may be issued to show cause why the license should not be modified, suspended, or revoked or why such other action as may be proper should not be taken.

THE NUCLEAR REGULATORY COMMISSION

Bruce A. Wilson, Chief
TVA Projects
