Theron J. Godfrey, Administrator

June 2, 1982

Nuclear Regulatory Commission
Attn: Glen D. Brown
Region IV
611 Ryan Plaza Drive, Suite 1000
Arlington, TX 76011

Gentlemen:

In response to the Notice of Violation dated May 19, 1982 and issued by your office, we wish to inform you of the corrective steps being taken by Logan Regional Hospital.

For items 1a, 1c, 1d, and 1e (see attached Notice of Violation) the personnel involved in performing the operations mentioned have been instructed on proper performance of the operations in violation by the Radiation Safety Officer, (Dr. Jonathan Daines) and the documentation of this inservice will be reviewed by the Radiation Safety Committee at their next scheduled meeting. The records kept for the operations in violation will be specifically reviewed quarterly by the Radiation Safety Committee and noted in the minutes to insure against any further violations.

In response to 1b of the Notice of Violation, the Radiation Safety Officer has informed all members of the Radiation Safety Committee of the violation and the requirement to meet quarterly. Additionally, a reminder calendar has been established by the Medical Staff Secretary to insure that quarterly meetings are scheduled and held.

We anticipate that full compliance will be documented on or about July 9, 1982 when the next Radiation Safety Committee meeting is scheduled.

We hope that the steps we have taken will be satisfactory to document our compliance with our NRC license and to meet the provisions of 10 CFR 2.201.

Sincerely,

Theron J. Godfrey
Administrator
