NOV 14 1990

Illinois Department of Nuclear Safety
ATTN: Mr. Timothy A. Runyon
Section Chief, Office of
Environmental Safety
1035 Outer Park Drive
Springfield, IL 62704

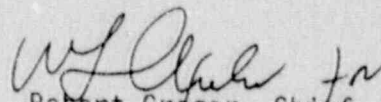

Dear Mr. Runyon:

Pursuant to your request of October 22, 1990, we are returning the completed IDNS low-level radioactive waste (LLRW) inspection checklists originally transmitted to us by letters dated January 22 and 24, 1990, regarding LLRW inspection activities at the Braidwood and LaSalle Nuclear Stations (enclosed). Our records show that we received inspection checklists for only those two stations.

Also, in confirmation of the telephone conversation between you and Dr. Charles Gill of my staff on November 9, 1990, NRC Region III inspectors are currently scheduled to perform three inspections, which will include low level radioactive waste processing and transportation, at nuclear power plants within Illinois before the end of the year. If you would like your inspector(s) to accompany us on any of these inspections please coordinate these accompaniments with Dr. Gill (708-790-5261). We believe that we can effectively accommodate up to two of your inspectors on each of these inspections.

If you have any questions, please contact me or Charles Gill of my staff.

Sincerely,

L. Robert Greger, Chief
Reactor Programs Branch
