Oklahoma X-Ray, Inc.
ATTN: Mr. Terry Brunner
President
P. O. Box 51384
Tulsa, OK 74151

Gentlemen:

This refers to the routine safety inspection conducted by Mr. R. C. Brown of this office on March 30, 1982, of the activities authorized by the NRC Byproduct Material License 35-17691-01 and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations, and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

During this inspection certain of your activities were found not to be conducted in full compliance with NRC requirements. Item 4 of the Notice of Violation issued under the guidelines of NRC Enforcement Policy (10 CFR Part 2, Appendix C), 47 FR 9987, is normally a Severity Level III violation under Supplement IV.C.3; however, since the integrity of the exposure device was not breached and the U. S. Nuclear Regulatory Commission, Region IV Office of Inspection was notified of the violation in a letter dated February 26, 1982, the violation severity level has been reduced to a Level IV violation. Consequently, you are required to respond to this matter, in writing, in accordance with the provisions of Section 2.201 of the NRC "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation attached to this letter.

The responses directed by this letter and accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
