

APPENDIX

NOTICE OF VIOLATION

Oklahoma X-Ray, Inc.

Docket: 30-13724  
License: 35-17961-01

As a result of the inspection conducted on March 30, 1982, and in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C), 47 FR 9987 (March 9, 1982), the following violations were identified:

1. 10 CFR 20.403(b)(4) states, in part, that each licensee shall within 24 hours notify by telephone and telegraph, mailgram, or facsimile, the Director of the appropriate NRC Regional Office of any incident involving licensed material possessed by him and which may have caused or threatens to cause, damage to property in excess of \$2,000.

Contrary to this requirement, the NRC Regional Office was not notified within 24 hours of an incident that occurred on February 28, 1982, that caused property damage in excess of \$2,000.

This is a Severity Level IV violation (Supplement IV).

2. 10 CFR 20.102(a) requires that each licensee shall require each individual, prior to first entry into the licensee's restricted area under such circumstances that the individual is likely to receive, in any period of one calendar quarter, an occupational dose in excess of 25 percent of the standards specified in 20.101(a), to disclose in a written, signed statement, either (1) that the individual had no prior occupational dose during the current calendar quarter, or (2) the nature and amount of any specifically identified current calendar quarter from sources that specifically possessed or controlled by other persons.

Contrary to this requirement, a signed statement, attesting to prior occupational dose, was not obtained from a worker hired in January 1980 and prior to his first entrance into a restricted area.

This is a Severity Level IV violation (Supplement VI).

3. 10 CFR 71.5(a) requires, in part, that no licensee shall transport any licensed material outside of the confines of his plant or other place of use, or deliver any licensed material to a carrier for transport, unless the licensee complies with applicable requirements of the regulations appropriate to the mode of transport, of the Department of Transportation in 49 CFR Parts 170-189.

- (a) 49 CFR 173.393(a)(1) requires, in part, that before that first shipment in a package approved by the U. S. Nuclear Regulatory Commission for use by another person, each shipper shall register in writing with the U. S. Nuclear Regulatory Commission, Division of Materials Licensing, his name and address, the name of the person to whom the U. S. Nuclear Regulatory Commission approval was issued, and the approval number assigned to the package.

Contrary to this requirement, the licensee did not register prior to using Technical Operations Model 750 source changer during the period of January 10, 1980, to February 18, 1982.

- (b) 49 CFR 173.398(a), Note 1, requires, in part, that the shipper of special form radioactive material shall maintain on file for at least one year after the last shipment, a complete certification and supporting analysis demonstration that the special form material meets the requirement of paragraph (a) of that section.

Contrary to this requirement, no such records were maintained for transports of special form radiography sources during the period January 1980, to February 1982.

This is a Severity Level V violation (Supplement VI).

4. 10 CFR 20.408(b) states, in part, that when an individual terminates employment with a licensee described in paragraph (a), the licensee shall furnish to the U. S. Nuclear Regulatory Commission a report of the individual's exposures to radiation and radioactive material, incurred during the period of employment.

Contrary to this requirement, no such report was furnished to the U. S. Nuclear Regulatory Commission for an employee terminated in April 1980.

This is a Severity Level V violation (Supplement VI).

Oklahoma X-Ray, Inc.

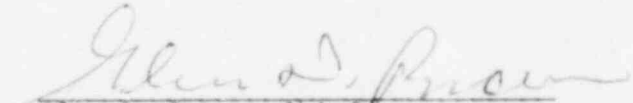

-3-

Pursuant to the provisions of 10 CFR 2.201, Oklahoma X-Ray, Inc., is hereby required to submit to this office, within 30 days of the date of this Notice, a written statement or explanation in reply, including:

- (1) the corrective steps which have been taken and the results achieved;
- (2) the corrective steps which will be taken to avoid further violations; and
- (3) the date when full compliance will be achieved.

Consideration may be given to extending your response time for good cause shown.

Dated July 26, 1982

  
Glen D. Brown, Chief  
Technical Program Branch
