Inspection Summary

Inspection on November 21, 1978: (Report No. 50-276/78-03)

Areas Inspected: Routine, unannounced security inspection of the licensee's physical protection program as implemented by their approved security plan. The areas inspected were applicable portions of the security plan, essential equipment, security organization, access control, security systems, surveillance, and security program review. The inspection was initiated during normal work hours and involved three inspector-hours on site by one NRC inspector.

Results: Of the seven areas inspected, no items of noncompliance were disclosed.
