General Comment

Holtec International, in consortium with SNC-Lavalin of Canada (SNCL), has applied to the U.S. Nuclear Regulatory Commission (NRC) to take over the Indian Point (IP) nuclear power plant license on the Hudson River just upstream from New York City under the guise of decommissioning Indian Point and managing the removal of the radioactive waste, but their true interest is in winning access to the 2.1 billion dollar trust fund established for this process. They have a history of scandal and should not be trusted to safely or effectively manage this operation
