

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION
RELATED TO AMENDMENT NO. 134 TO FACILITY OPERATING LICENSE NO. DPR-40
OMAHA PUBLIC POWER DISTRICT
FORT CALHOUN STATION, UNIT NO. 1
DOCKET NO. 50-285

1.0 INTRODUCTION

By letters dated September 6, 1990, as supplemented September 17, 1990, Omaha Public Power District (OPPD) requested changes to the Fort Calhoun Station, Unit No. 1, Technical Specifications (TSs). The proposed changes were administrative in nature.

2.0 DISCUSSION

The licensee's proposed changes to the Fort Calhoun Station's TSs are administrative corrections. These changes are as follows:

Page 3-62a

The reference to "FSAR" is changed to read "USAR." The original Final Safety Analysis Report (FSAR) is updated as per requirement 10 CFR 50.71, and the updated FSAR is referred to as the Updated Safety Analysis Report (USAR).

Page 5-3

Changes are being made to the Plant Review Committee. In order to maintain independence between the Plant Review Committee and its auditing entities, the Manager of the Safety Review Group and the Manager of Quality Assurance and Quality Control are being replaced by the Assistant Plant Manager and a Reactor Engineer. These replacements are being added to maintain the breadth and depth of technical knowledge.

These two changes are administrative in nature; and therefore, the staff finds them acceptable.

3.0 ENVIRONMENTAL CONSIDERATION

This amendment relates to changes in recordkeeping, reporting, or administrative procedures or requirements. Accordingly, the amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(10). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of the amendment.

4.0 CONCLUSION

The staff has concluded, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations, and the issuance of the amendment will not be inimical to the common defense and security or to the health and safety of the public.
