SUBJECT: Renewal of Radioactive Material Packaging Quality Assurance Program  
Docket # 71-0109.

Dear Mr. MacDonald,

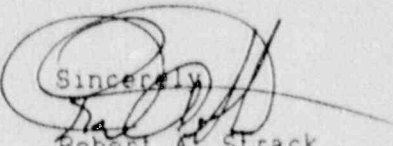

Attached is an application for renewal of our Radioactive Material Packaging Quality Assurance Program, Docket # 71-0109. Revisions to this program are of the following two types:

- 1) A new organizational structure has been developed to accommodate the facility decommissioning activities that Cintichem is preparing to undertake. That structure, along with new job titles, is incorporated into the attached plan. We are currently in a transition period between the old and new organization reflected in this plan but there will be no lapse in either PQA actions or responsibilities during this period.
- 2) Cintichem has shut down its Reactor and Radiochemical Production facilities and is no longer packaging radiochemical products for shipment from those facilities. The attached plan is revised to reflect the discontinuance of those shipments.

Activities conducted under applicable criteria of Subpart H of 10CFR Part 71 will continue to be executed with regard to transportation packages.

Enclosed are six copies of the revised plan and checks totaling \$180.00 towards this program renewal in accordance with 10CFR170.31.

Sincerely,

  
Robert A. Strack  
Project Engineer
