EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 While Unit 2 was in hot shutdown and after taking 2B MSIV OOS, the
 0 3 valve drifted open. The OOS was cleared and the hydraulic pump was re-
 0 4 energized, causing the MSIV to reclose. This is a violation of Tech
 0 5 Spec 3.9.4.A which requires that MSIVs be operable except in cold shut-
 0 6 down. The FSAR assumes the inability of one MSIV to properly function.
 0 7 The health and safety of the public were not affected. Previous LERs
 0 8 50-304/79-009 and 50-304/81-07.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 Failure to open drain valve, giving zero differential pressure across
 1 1 MSIV disc, combined with postulated hydraulic leakage to actuator open
 1 2 ed MSIV. Signs now posted at breaker and letter issued reminding operat
 1 3 tors to verify drain position locally. Studying addition of valve to
 1 4 prevent hydraulic leakage. No further corrective action required.
