Indianapolis, IN 46202

License No. 13-06147-04
Docket No. 030-12208
EA 90-202

Gentlemen:

This refers to the special safety inspection conducted by James R. Mullauer, M.H.S. of this office on November 14, 1990, of activities authorized by NRC Byproduct Material License No. 13-06147-04 and to the discussion of our findings with you at the conclusion of the inspection.

The special safety inspection was conducted to review the circumstances surrounding a radiography incident that occurred on September 12, 1990, and subsequent incident that occurred on October 31, 1990. In a letter dated October 1, 1990, you notified our office of the September 12, 1990, incident; however, your evaluation concerning an exposure to an individual needed further clarification. Your second notification clarifying the individual's exposure indicated that the extremity dose exceeded Part 20 limits.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, a reenactment of the incident, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements. You will be notified by separate correspondence of our decision regarding enforcement actions based on the findings of this inspection. No written response is required until you are notified of the proposed enforcement action.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
