License No. 12-12675-01
License No. 12-12675-03E

Gentlemen:

This refers to the routine safety inspection conducted by Dr. L. W. Shatterly of this office on August 3, 1982, of activities authorized by NRC Byproduct Material Licenses No. 12-12675-01 and No. 12-12675-03E and to the discussion of our findings with you and Mr. John S. Dema at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated December 19, 1979, regarding apparent items of noncompliance found during our November 8 and 13, 1979, inspection. We have no further questions regarding these matters.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. G. Wiedeman, Chief
Materials Radiation Protection
