Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NO. 50-267/90-18)

This refers to the inspection conducted by Mr. R. A. Caldwell of this office during the period October 22-26, 1990, of activities authorized by NRC Operating License DPR-34 for Fort St. Vrain Nuclear Generating Station, and to the discussion of our findings with Mr. C. Fuller and other members of your staff at the conclusion of the inspection.

The inspection reviewed certain areas of your physical security program. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Normally, you are required to respond to this violation, in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. However, your immediate corrective actions taken during this inspection period, and your planned actions to prevent recurrence have been reviewed and found to be responsive to the specifics contained in the Notice of Violation enclosed with this letter. Therefore, no written response to this violation is required.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material, with the exception of the Notice of Violation and the report cover page which is an inspection summary, will not be placed in the Public Document Room.
