RDH

WEST VALLEY PROJECT OFFICE
MEMORANDUM

To: Mr. Davis Hurt
From: Dave Merrill *DM*
Date: November 29, 1990
Subject: Concrete Schedule

Please find attached our schedule for forming, rebar installation, and concrete placement. This schedule has not been approved by WVNS since the master schedule, from which this was extracted, extends beyond the J. A. Jones contract end date.

This schedule, along with the attached sketches, shows the plan for construction of the seismic Sludge Mobilization System pipe trench and valve pits. Also shown is the plan for forming and placement of concrete in the cell wall modules.

We have not attempted to forecast the actual placement dates since there are many variables which could accelerate or delay the actual placement. As you plan your visits we can give you a better idea of the work taking place.

Please contact me at extension 4516 if you have any questions on this schedule.

Davis:

11/29/90

If you need anything more give me a call.
