NOTICE OF VIOLATION

Fyrnetics, Inc.

License No. 12-16701-01

License No. 12-16856-01E

As a result of the inspection conducted on August 2, 1982, and in accordance with the NRC Enforcement Policy, 47 FR 9987 (March 9, 1982), the following violations were identified:

License No. 12-16701-01

1. License Condition No. 14 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in application received September 9, 1980. Item 11a of the application states that the radiation detection instruments will be calibrated semiannually.

Contrary to the above, the NRC inspector learned through statements of licensee representatives and a review of records, that this requirement was not met. Specifically, Eberline instruments, RM-15, Radiation Monitor, and SAC-4, Scintillation Alpha Counter, were last calibrated June 8, 1978 and November 20, 1981, respectively. Specifically, these intervals are in excess of the semiannual calibration requirement.

This is a Severity Level V violation (Supplement VI).

License No. 12-16856-01E

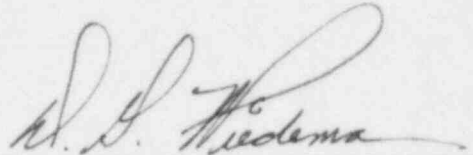

2. 10 CFR 32.29(c) requires that you submit an annual summary report to the Commission within thirty days following the year ending June 30, stating: (1) a description or identification of the type of each product; (2) for each radionuclide in each type of product, the total quantity of the radionuclide; and (3) the number of units of each type of product during the reporting period. If no transfers of byproduct material have been made pursuant to 10 CFR 32.26 during the reporting period, the report shall so indicate.

Contrary to this requirement, as of the day of the inspection, August 2, 1982, you failed to submit annual reports to the Commission for the periods ending June 30, 1980, 1981, and 1982, respectively.

This is a Severity Level V violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
