Subject: Training and Technology Center  
NPDES Permit NC0026255  
Transfer of Waste Water  
File: MC 702.13

Dear Mr. Gleason:

As agreed in our earlier conversations, we would like to notify you of a transfer of laboratory rinse water to the site sanitary treatment system. During the week of November 1, 1993, the laboratory will be transferring approximately 1000 gallons of water from the exterior holding tank to the sanitary treatment system.

On September 15, 1992, Duke Power Company had applied for a modification to the Training and Technology Center (TTC) NPDES permit to include an additional waste stream from the laboratory. Due to the duration of the permitting process, the TTC has exhausted its reserve capacity for storing laboratory rinse water from the radiochemistry laboratory.

The water which will be transferred meets all the characteristics of routine laboratory wastewater for which the system has been permitted. No impact to the treatment system or to the environment is anticipated.

If you should need additional information or have questions, please contact Norma Atherton at (704) 875-5963. Thank you for your assistance in this matter.

Sincerely,

*Norma D. Atherton*
