Dear Sirs,

I wish to comment on the use of Epicon II water purification system at T.M.I. Middletown, Pa. I go on record as being completely opposed as this system has never been tried before. Furthermore, there will be solid radioactive wastes + storage tank cleansing water to dispose of. Additionally, there is another 600,000 gallons of more highly radioactive water stored in T.M.I. (UNIT II) containment building.

Being a resident of Lancaster County, Pennsylvania, and a consumer of drinking water, I am highly concerned about present and future dumping of contaminated wastes.

Please comment. Thank you. Sincerely
DALE STRICKLER
