Point of Rocks, Wyoming 82942
(307) 382-9141

November 2, 1993

Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: "Reply to Notice of Violation" Docket: 030-09530

Attention Control Desk:

This letter is the reply to the "Notice of Violation" that resulted from an NRC inspection of the Jim Bridger Plant on July 13, 1993. The reason for the violation was that the present radiation safety officer was not the same person as the one listed on the NRC License 36-15657-01. The radiation officer present at the time of the inspection had attended the same radiation safety training course as Mr. Dave Sharp, the listed radiation safety officer.

The corrective action taken to resolve the "Notice of Violation" was to renew and amend our license. We now have a new license No. 49-27478-01 dated October 21, 1993 from your Region IV office in Arlington, Texas. Item No. 11 of our new license has been changed to the following: Licensed material shall be used by, or under the supervision of, Dale Gillespie or individuals who have completed TN Technologies 40 hour Radiation Safety Course. The Radiation Officer for this license is Dale Gillespie. In order to avoid further violations, we will ensure the license will be amended as required on a timely basis.

We were in full compliance with Nuclear Regulatory Commission Regulations on October 21, 1993 when we received our new NRC license No. 49-27478-01.
