TMIPO
USNRC

Sir:

I have been reading NUREG 0698
and I am not happy.

1st, the TMI-2 Advisory Panel
will consist of members of the
public.

Will these members of the public
be chosen by the NRC or will they
be chosen from anti-nuclear
activists? Isn't that an obvious
question?

I want to point out that the
public gets no early-on input
into the PEIS. (Figure 3.1)

The position of the NRC is solidified
at this point and comments do
little to open the NRC's

eyes to its own errors. (you
think the NRC doesn't make
mistakes? Try 3/28/79 at TMI #2)

Please put me on distribution
list of PEIS of TMI cleanup.

When the TMI #1 reactor has
an accident, put me on
that PEIS cleanup list too.

Marvin Lewis
