

~~TO WHOM IT MAY CONCERN~~
To whom it may concern re concern
over drinking water purity.

Solar energy may well have many
ramifications and uses.

Experience has taught that
water vapors lifted into the
atmosphere comes down as rain
purified if the hosting atmosphere
is free of contaminants.

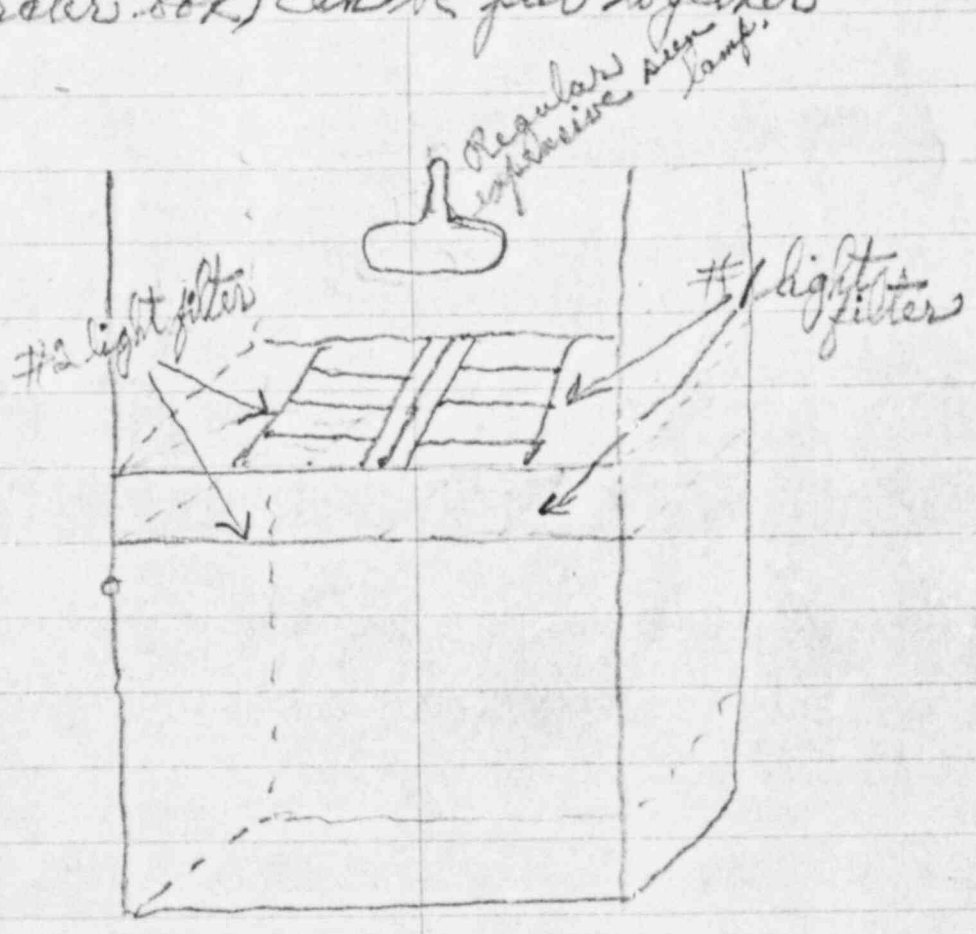

With this theory the following
suggestions are given freely
in the hope such an inexpensive
experiment may possibly offer
hope.

~~Suggestions for purifying~~

Suggested experimentation to learn if this method has merit re radiation elimination from drinking waters. Use of color light filters employed. A simple cabinet (even an old refrigerator box) can be put together

Art glass of the above colors ^{or sizes} are to be cut and assembled as pictured.

Two alike #1 and of #2 are placed
 one #1 exactly above the other #1-3" apart.
 one #2 " " " " #2-3" apart.
