DOCKET CLERK

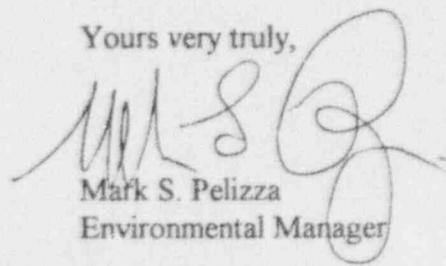

Dear Mr. Hall:

At the request of the New Mexico Environmental Department (NMED), and for use at the NMED public hearing which will be conducted on October 26, 1993, we have contracted with Espey, Huston and Associates, Inc., to conduct a Surface Water Drainage Analysis at the Churchrock site. We are enclosing three copies of the final report and request that it be included as a supplement to the Applicant's Environmental Report, which is currently under review for the HRI New Mexico uranium production operation.

In general, the study shows that the facility will be located outside the influence of any flooding.

Please feel free to contact me with questions.

Yours very truly,

Mark S. Pelizza
Environmental Manager
