U.S. Nuclear Regulatory Commission
Washington, D.C.

DOCKET NUMBER
PROD. & UTIL. FAC. 50-443/444

Dear Commissioners:

I am writing to ask you to undertake an immediate review of the evacuation situation within a 10 mile radius of the reactor under review. The recent events at the Indian Point nuclear reactor seem to demonstrate once again that accidents can and will happen. Clearly, demonstrably effective evacuation procedures are a necessity around operating reactors.

I fear that once PDR applies for its operating license for Unit 2 a great deal of political pressure will be exerted to get its quick approval. A thorough and painstaking review of evacuation plans are needed, but I have seen needed studies and reviews sacrificed to expediency in the past. No more time should be allowed to go by before this review is undertaken. Please take action at once.

Sincerely,
Care Doughty
