Dallas, Texas 75201

SUBJECT: NRC INSPECTION REPORT 50-445/93-43; 50-446/93-43

This refers to the inspection conducted by Mr. J. I. Tapia of this office, and the personnel identified in the enclosed report, on November 15-19, 1993. The inspection included an assessment of the qualifications of 11 individuals who had applied for licenses to operate your Comanche Peak Steam Electric Station, Units 1 and 2. At the conclusion of the inspection, findings of generic significance were discussed with Mr. Joe Donahue and those members of your staff identified in the enclosed report. Appropriate licenses have been issued to the 11 applicants who successfully completed all portions of their examinations.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of evaluation of license applicants by the use of written examinations, dynamic simulations, selected job related tasks, and oral questioning in accordance with NUREG-1021, "Operator Licensing Examiner Standards," Revision 7. The results of this inspection are documented on page 2, in the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
Samuel J. Collins, Director  
Division of Reactor Safety
