TMI-Unit 1
Middletown, PA

Dear Mr. Ahearne:

Your help is needed in getting NRC action for start-up of Three Mile Island Unit-1. Startup of this plant is urgently needed to replace the extremely high-priced oil-fired power that is presently being used by those people living in that area. Unit-1 was not damaged in the earlier incident. There is no technical reason why the plant should not be started up and producing power.

Sincerely,

Mary L. Kendall
