

DOCKET NUMBER
PROD. & UTIL. FAC. 50-289

The Honorable John F. Abner, Chairman
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Commissioner John F. Abner:

I am, retired person who has made
hard-earned money during his working years
and purchased General Public Utilities
to supplement SS payments to provide
for the needs of my family and myself in
my retired years.

I believe that the stockholders of
the company have been punished enough
for chain of events that have occurred
at Three Mile Island. It is difficult
for retired people like myself to understand
why your commission has not given
"G.P.U." permission to restart TMI-1
nuclear plant. This plant is necessary
to help take some of the ^{financial} burden that
"G.P.U." has to shoulder. Notwithstanding,

8012170651

II
The customer of "Y P 21".

I believe you have the responsibility to see that this matter receives prompt attention in fairness to the stockholders, ^{and} customers. The company needs a fair rate of return on the money the stockholders ~~were~~ were willing to invest.

Mr. Ahearn, I would appreciate if you can give me some reasonable answers to all of this bureaucratic strangulation of a company and the people behind it.

Yours sincerely
Charles Sufleski
