

BUCKET NUMBER 50-289
PROD. & UTIL. FAC.

Hutchinson, Kansas
December 9, 1980

Joseph M. Hendrie, Commissioner
U. S. Nuclear Reg. Comm.
Washington D. C. 20555

Dear Commissioner:

It has been twenty months since the accident at Three Mile Island II. At the time TMI I was in operation, presumably efficiently and safely.

Surely by now, the closed No. 1 Plant has been inspected and brought to the necessary safety standards required by your Commission.

I suspect the fear of opposing the attitudes of the Anti-Nuclear public, which I presume prevails in the proximity of Harrisburg, is a reason for not allowing the restart.

It must be shown that Nuclear Power has demonstrated to be the safest and as yet the most economical source of electricity, therefore I urge you to allow restart of TMI I soon.

Yours very truly,

Harold R. Reed
