SUBJECT Unit 1 of Three Mile Island - docket 50-289 SP 12/9/80 DATE

MESSAGE We enjoy reasonably priced electricity in Wisconsin, probably due to the successful operation of the nuclear plants in our state. We believe in nuclear plants with reasonable safeguards.

We urge you to allow the start up of unit one of Three mile island. Our country needs nuclear power. We wonder why plant one has been made to sit idle for this length of time?

Please take prompt action to allow this plant to come back into operation.

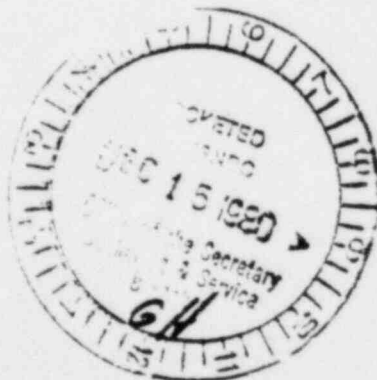

It seems to me that the Nov vote in our country indicates the dissatisfaction of the people over the present handling of nuclear energy matters.
