

back to now? Should I assume
that since we have no plans
there are no workable plans?
Are my children to be the "throwaway"
in case of another accident at TMI?

How can you license a nuclear
plant when there is no place to
send the waste? Do Berwick and
TMI fit the requirements for nuclear
waste dumps, or do you change the
criteria for these areas to suit
your needs?

Are you working for the people
of our nation or the monied interests
of our nation?

How angry, upset and emotional
do we have to be to get your
help and understanding.

May God help us (we know
the NRC won't)!
Mary Ann Charles
