SUBJECT: NRC INSPECTION REPORT 50-498/93-41; 50-499/93-41

This refers to the inspection conducted by Mr. J. I. Tapia of this office on November 28 through December 3, 1993. The inspection included a review of activities authorized for your South Texas Project Electric Generating Station, Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Areas inspected pertained to those open items in the area of operations staffing which are required to be resolved prior to restart of Unit 1. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. As a result of this inspection, the operations staffing Restart Issue No. 6 is resolved and is considered closed.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
Samuel J. Collins, Director  
Division of Reactor Safety
