

Docket 50-289SP

DOCKET NUMBER 50-289
PROD. & UTIL. FAC.

12-13-80

Dear Mr. Ahearne;

I would like to encourage the NRC to allow the TMI unit 1 to start up as soon as possible. The electricity is needed now and the unit is obviously safe, since it is essentially the same as Unit 2; which hurt no one. Thanks for hearing my points of view - and please act quickly - that TMI electricity will replace alot of foreign oil!

Vern Blanchett

P.S. I support the cleanup and restarting of TMI unit One also. Before moving to California my family and I lived within 20 miles of 7 nuclear plants in Illinois - and would not hesitate to do so again! Merry Christmas!
