Mr. Thomas M. Novak  
Assistant Director of Licensing  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Novak:

South Texas Project  
Units 1 & 2  
Docket Nos. STN 50-498, STN 50-499  
Response to Questions 482.1 and 482.2

In a letter dated June 7, 1982, Mr. Frank J. Miraglia transmitted to Mr. George W. Oprea, Jr. several questions to be addressed prior to completion of the Corrosion Engineering Section's review of Houston Lighting & Power Company's (HL&P) South Texas Project operating license application.

In response to question 482.1, HL&P will develop and provide a secondary system chemistry control program document which will be supported by detailed operating procedures. These documents will contain all of the elements outlined in the request for information. In response to 482.2, it is expected that the secondary system chemistry control program will be consistent with Westinghouse technical recommendations. Significant deviations will be based on operating plant experiences and lessons learned from the EPRI/Steam Generator Owners Group II activities.

The information requested will be provided no later than eighteen months prior to Unit 1 fuel loading.

Very truly yours,

J. H. Goldberg  
Vice President  
Nuclear Engineering and Construction
