Director of Nuclear Reactor Regulation  
Attention: Mr. W. P. Haass, Chief  
Quality Assurance Branch  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Haass:

Enclosure 1 provides 20 copies of corrected sheets from tables 17.2-1 and 17.2-5 for Revision 5 of TVA's Topical Report, TVA-TR75-1A, "Quality Assurance Program Description for Design, Construction, and Operation of TVA Nuclear Power Plants." These corrections are for minor publication errors concerning the proper identification of the document and the revision number in two of the tables. An instruction sheet for replacement pages is provided.

Enclosure 2 is a proposed revision, with justification, to section 17.2-2 which will be incorporated into draft Revision 6 of TVA-TR75-1A. Since the proposed change more clearly reflects current practice in our operational QA training program, we request you review and approve this change to TVA's QA program description before submittal of proposed Revision 6.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
