Re: Docket No. 50-133, OL-DPR-7
Humboldt Bay Power Plant, Unit 3
Revision 4 to the Physical Security Plan

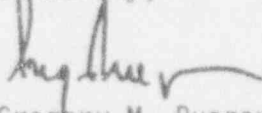

Gentlemen:

Enclosures 1 and 2 contain information regarding changes to the Humboldt Bay Power Plant Unit 3 Physical Security Plan (PSP). These changes do not decrease the safeguards effectiveness of the PSP and are submitted pursuant to 10 CFR 50.54(p).

Enclosure 1 identifies and describes the changes, which are indicated with revision bars in the left margin of the PSP. Enclosure 2 provides Revision 4 of the PSP. In accordance with 10 CFR 2.790(d), PG&E requests that the enclosures be withheld from public disclosure.

During preparation of this revision to the PSP, PG&E determined that some of the changes identified in this revision had been previously implemented, but descriptions of these changes had not been submitted to the NRC within two months after making the changes, contrary to the requirements of 10 CFR 50.54(p). A nonconformance report has been initiated to identify the reasons for this oversight and appropriate corrective actions to prevent recurrence.

Sincerely,

Gregory M. Rueger
