ARTICLE I - STATEMENT OF WORK

A. Background

On September 3, 1981 the Nuclear Regulatory Commission (NRC) published (46 FR 44149) in the Federal Register a final rule that (1) clarifies its jurisdiction (with respect to Agreement States\*) over persons using by-product, source, or special nuclear materials in certain "off-shore waters,"\*\* (2) recognizes Agreement State specific licenses in an NRC general license covering activities in these waters, and (3) allows Agreement States, under section 274 (i) of the Atomic Energy Act of 1954, as amended, to perform inspections and other functions for NRC in these waters. Pursuant to this rule, the NRC expects to eventually enter into formal agreements under Section 274(i), whereby NRC will authorize certain States to perform for and on its behalf certain functions in "off-shore waters".

\*States which have entered into an Agreement with the Atomic Energy Commission or the NRC pursuant to Section 274 of the Atomic Energy Act of 1954, as amended under which the NRC has relinquished to such States the majority of its regulatory authority over source, byproduct, and special nuclear material in quantities not sufficient to form a critical mass.

\*\*"Off-shore waters" means that area of land and water, beyond Agreement States Submerged Lands Act Jurisdiction, on or above the U.S. Outer Continental Shelf.

B. Work Required

The Contractor (State of California) will undertake and perform a survey, providing the following information and performing the activities as described below:

1. Identification of Licensees

Identify the number of California licensees currently performing activities pursuant to 10 CFR Part 150 in off-shore water, including their identity by name and license number. If possible, identify other licensees including the agency which issued their licenses.

2. Identification of Work Locations

Identify the appropriate locations in the off-shore waters where work is currently being performed. If possible, identify locations where work has been performed in the preceding 12 month period and where work is anticipated in the next 12 month period.

3. Description of Work

For each location provide a description of the work being performed, methods of handling licensed material including storage, procedures for transporting material to and from off-shore locations, the number of radiation workers employed by each licensee at each off-shore location, the number of non-radiation workers at each off-shore location, and any problems encountered, e.g. authorization for access to barges.

ARTICLE IV - OBLIGATION

The amount presently obligated by the NRC with respect to this contract is ten-thousand dollars (10,000.00) NTE.

ARTICLE V - PAYMENT

Payment shall be made in accordance with Clause 2 of the General Provisions entitled "Payment" as soon as practicable after successful completion of each course and upon submission by the contractor of voucher(s) in a form satisfactory to the Contracting Officer, provided, however, that said payment(s) shall not be deemed to prejudice any rights which the Government may have by law or under other provisions of this contract.

In the absence of a discount, the contractor shall be paid upon the submission of a proper and correct invoice or voucher in approximately thirty days after submission or date of delivery, whichever is later, the prices stipulated herein for supplies delivered and accepted or services rendered and accepted, as herein provided.

If this order provides for a discount, the contractor shall indicate the order's discount terms on the invoice or voucher.

ARTICLE VI - PROJECT OFFICER

Catherine T. Yaczko is hereby designated as the Contracting Officer's authorized representative (hereinafter called Project Officer) for technical aspects of this contract. The Project Officer is not authorized to approve or request any action which results in or could result in an increase in contract costs; nor to terminate or settle any claim or dispute arising under the contract; nor to issue any unilateral directive whatever.

The Project Officer is responsible for:

1. monitoring the contractor's technical progress, including surveillance and assessment of performance, and recommending to the Contracting Officer changes in requirements;
2. interpreting the scope of work;
3. performing technical evaluation as required;
4. performing technical inspections and acceptances required by this contract;  
and
5. assisting the contractor in the resolution of technical problems encountered during performance.

Within the purview of this authority, the Project Officer is authorized to review all costs requested for reimbursement by the contractor and submit recommendations for approval, disapproval, or suspension for supplies/services required under the contract. The Contracting Officer is responsible for directing or negotiating any changes in terms, conditions, or amounts cited in the contract.

For guidance from the Project Officer to the contractor to be valid, it must:

1. be consistent with the description of work set forth in this contract;
2. not constitute new assignment of work or change of the expressed terms, conditions, or specifications incorporated into this contract;
3. not constitute a basis for an extension to the period of performance or contract delivery schedule; and
4. not constitute a basis for any increase in the contract price.

#### ARTICLE VII - INSPECTION AND ACCEPTANCE

Acceptance of the services and final report to be delivered hereunder will be made by the Project Officer.

#### ARTICLE VIII - GENERAL PROVISIONS

This contract is subject to the attached General Provisions entitled "Fixed Price Research and Development Contracts Under \$10,000.00," dated November 14, 1977, which incorporates the FPR Changes and Additions and NRC Additions.

Clause 14 of the General Provisions entitled "Patent Rights - Acquisition By the Government" is deleted in its entirety.
