UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

January 15, 1981

Docket No. 50-344

Mr. Bart D. Withers  
Vice President Nuclear  
Portland General Electric Company  
121 S.W. Salmon Street  
Portland, Oregon 97204

Dear Mr. Withers:

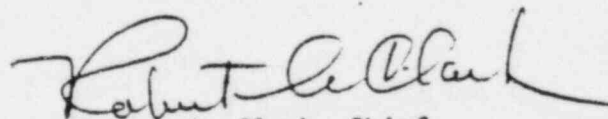

Pursuant to the enclosed Memorandum and Order of the Atomic Safety and Licensing Appeal Board dated January 6, 1981 (ALAB-627), we have issued the enclosed Amendment No. 55 to Facility Operating License No. NPF-1 for the Trojan Nuclear Plant. The amendment is effective immediately, and consists of a revision to license condition 2.C.(12). The revision requires accelerated reporting by you of any deviations or changes to the approved Control Building modification program accomplished in accordance with 10 CFR 50.59.

We have determined that the amendment does not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR §51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

Because the amendment involves only reporting requirements, we have concluded that there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and that such activities will be conducted in compliance with the Commission's regulations and the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.

A copy of the Notice of Issuance is also enclosed.

Sincerely,

  
Robert A. Clark, Chief  
Operating Reactors Branch #3  
Division of Licensing
