MEMORANDUM FOR: Darrell G. Eisenhut, Director  
Division of Licensing

FROM: Richard H. Vollmer, Director  
Division of Engineering

SUBJECT: REQUEST FOR SURVEY OF OIL FILLED TRANSFORMERS  
WITHIN BUILDINGS

I would like to compile information on the operating nuclear plants that have oil filled transformers within buildings containing safety and shutdown systems and whether the fire protection for these transformers complies with NRC guidelines delineated in Section D.1.h of Appendix A to ETP-ASB 9.5-1. To make such a compilation expeditiously, I request that the Project Managers conduct a telephone survey over the next two weeks to obtain answers to the following questions:

1. Does the plant have oil-filled transformers within buildings containing safety or shutdown systems? Yes or No.
2. If yes, how many transformers and does the fire protection meet NRC guidelines?
