SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION
RELATED TO AMENDMENT NO. 88 TO FACILITY OPERATING LICENSE NO. NPF-30

UNION ELECTRIC COMPANY

CALLAWAY PLANT, UNIT 1

DOCKET NO. 50-483

1.0 INTRODUCTION

By application for license amendment dated February 25, 1992, Union Electric Company (the licensee), requested changes to Technical Specifications (TS) for the Callaway Plant, Unit 1. The proposed changes would revise Sections 6.5.2.2 and 6.5.3 to reflect the title change of the General Manager, Nuclear Operations.

2.0 EVALUATION

The licensee has proposed changes to Section 6 of the Technical Specifications. The changes revise the title of the General Manager, Nuclear Operations to Vice President, Nuclear Operations for the Union Electric Company, Callaway Plant. Specifically, the title change reflects a company restructuring with no impact on line responsibility, reporting relationships, or approval authority. The proposed change does not affect minimum qualification commitments or the experience base at the Callaway plant.

Since the change is administrative in nature, the staff finds the proposed change acceptable.

In accordance with the Commission's regulations, the Missouri State official was notified of the proposed issuance of the amendment. The State official had no comments.

4.0 ENVIRONMENTAL CONSIDERATION
