NOTICE OF VIOLATION

Quality Testing Inc.

License No. 34-17799-01

As a result of the inspection conducted on July 29, 1982, and in accordance with the NRC Enforcement Policy, 47 FR 9987 (March 9, 1982), the following violations were identified:

1. License Condition No. 16 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in various dated applications and letters.

Application dated October 5, 1977 reference your Radiation Safety and Control Manual. This manual, Part I, paragraphs 2.6.1 and 2.7.1, requires "Quarterly Safety Meetings" to be given by the RSO to all radiographers and assistant radiographers, and shall be documented on Form RS-9. Also, each radiographer and assistant radiographer must complete a review test to be administered semi-annually. The graded tests shall be maintained on file.

Contrary to these requirements, no records of safety meetings were available. Also, semi-annual review tests have not been given to all radiographers and assistant radiographers.

This is a Severity Level IV violation (Supplement VI).

2. License Condition No. 16 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in various dated applications and letters.

Letter dated January 23, 1978, Item No. 3, references your Radiation Safety and Control Manual, Part I, paragraph 1.2. Paragraph 1.2 requires the RSO to conduct unscheduled surveys of each radiographer and assistant radiographer once every three months. Form RS-10 is used to document such surveys.

Contrary to this requirement, no records of surveys of radiographic personnel are maintained.

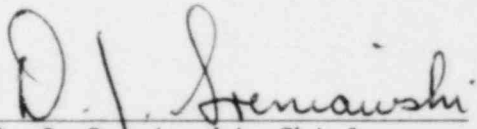

This is a Severity Level V violation (Supplement VI).
